Thank you Ms. Kathryn for providing this valuable information. If you have received information on the exact interval(s) that will make up the additional 45 feet of perforations that TexCom has indicated it will add to the injection interval in the WDW-410 well, I would appreciate your sharing it with us. Thank you again for your cooperation. Have a nice afternoon,

Jose Eduardo Torres - 6WQ-SG

Subject	TexCom Gulf Disposal Amended Draft Permit WDW410

Jose,

As a follow up to our phone conversation, attached is the proposed amended draft permit WDW410 that the TCEQ executive director has filed with the State Office of Administrative Hearings (SOAH). Please refer to new Section V. titled "Recompletion Requirements" (page 2).

The amended draft permit clarifies that recompletion, testing, a completion report, and executive director approval prior to operation will be required for
